

## Setup of the material library

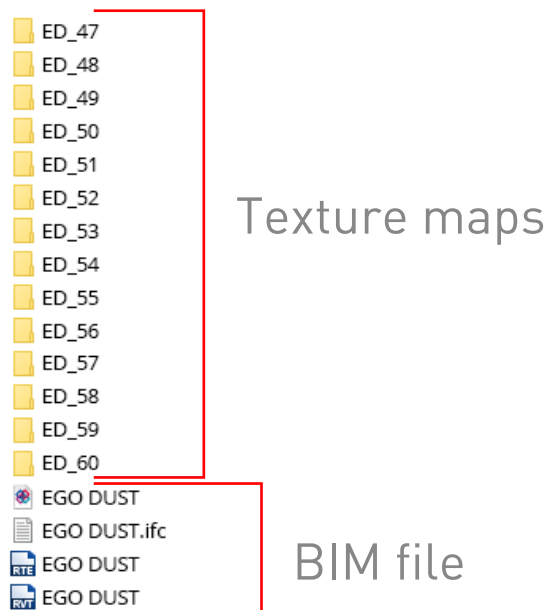

Create Linvea folder in C:\ and copy the downloaded BIM folder in it.  
See the below picture as example.

## Files organization

Inside the folder you find the following files:

- Material library in adsklib format containing product informations
- One folder for each LINVEA color containing the specific rendering maps: color, bump
- Native Autodesk Revit BIM family .rvt
- Native Autodesk Revit BIM family .rte
- Technical information in .pdf format containing all the information

## Setup instructions for ArchiCAD

For a correct using of the libraries in ArchiCAD follow these steps:

- Open “Surfaces Setting” panel
- Create new material and replace all texture maps
- Apply material to the wall or surface
